

FortiSIEM Firewall DHCP Clients Rule Exception Change Documentation

Problem

With initial rule exception being too broad, granularity was needed to ensure denied DHCP traffic will be blocked by reviewing both the Source and Destination Ports.

The current rule exception was based on Destination Ports 67/68. This was due to the necessary attributes not appearing under the “Attribute” dropdown during exception creation.

Actions Needed

To have **Source TCP/UDP Port** attribute appear under the Attribute dropdown:

1. Log in at [FQDNOFortiSIEMServer] with a ‘Full Admin’ account
2. Go to **Resources > Rules**
3. Select rule ***Sudden Increase in Firewall Denied Outbound Traffic To A Specific TCP/UDP port***
4. Click **Edit** and select **Step 2: Define Condition**
5. Next to Subpattern **StatHighPort**, click **Edit** to open **Edit SubPattern** window

The screenshot shows the 'Adware process found - Edit Details' window with the 'Step 2: Define Condition' tab selected. The condition is set to 'If this Pattern occurs within any 300 second time window'. Below this, there is a table with columns: Paren, Subpattern, Paren, Next, and Row. The 'Subpattern' column contains 'AdwareFound'. To the right of 'AdwareFound' is an edit icon (pencil) and a red underline. The 'Next' column is empty. At the bottom are 'Save' and 'Cancel' buttons.

Paren	Subpattern	Paren	Next	Row
	AdwareFound

Edit SubPattern

Name: DomainAcctLockout

Filters:	Paren	Attribute	Operator	Value	Paren	Next	Row
+	-	Event Type	IN	EventTypes: Domain Account Lockout	-	+	AND OR + -

Aggregate:	Paren	Attribute	Operator	Value	Paren	Next	Row
+	-	COUNT(Matched Events)	>=	1	-	+	AND OR + -

Group By: Attribute

Attribute	Row	Move
Reporting Device	⊙	↑ ↓
Reporting IP	⊙	↑ ↓
User	⊙	↑ ↓

Run as Query Save as Report Save Cancel

6. Under **Group By**, add a new row at the bottom
7. Set new row **Attribute** as **Source TCP/UDP Port** (This forces the rule to recognize the attribute and its value)
8. Click **Save**
9. Go to **Step 3: Define Action**
10. Next to **Action**, click **Edit**
11. Add a new **Incident Attribute** row at the bottom with the following:
 - a. Set **Event Attribute** as **Source TCP/UDP Port**
 - b. Set **Subpattern** as **StatHighPort**
 - c. Set **Filter Attribute** as **Source TCP/UDP Port**
12. Click **Save**

To add **Source TCP/UDP Port** on previous existing rule exception:

1. Log in at [FQDNOFFortiSIEMServer] with a 'Full Admin' account
2. Go to **Resources > Rules**
3. Select rule **Sudden Increase in Firewall Denied Outbound Traffic To A Specific TCP/UDP port**
4. Click **Edit** and select **Step 3: Define Action**
5. Next to **Exceptions**, click **Edit**

Subcategory: Execution
Action: Defined
Exception: Defined

Dashboard: ☐
Notification: 24 Hours
Impacts: Application
Watch List: Undefined
Clear: Undefined

Save Cancel

6. With one pre-existing Destination Port condition:
 - a. Add **Paren** before it
 - b. Set **Operator** as =
 - c. Set **Value** as **67**
 - d. Set **Next** as **AND**

Edit Rule Exception

An incident will not be generated if the following conditions match:

Paren	Attribute	Operator	Value	Paren	Next	Row
+	Destination Host Name	IN	MalwareSites: DigiCert, Malw:	+	AND	+

AND

An incident will not be generated during the following time periods:

Notes:

Exclusion: Mozilla Telemetry URL
Exclusion: Oracle Java Auto Updater URL
Exclusion: DigiCert SSL certificate revoke verification URL

Save Cancel

7. Add a new row directly under the altered **Destination Port** condition, with the following:
 - a. Set **Attribute** as **Source TCP/UDP Port**
 - b. Set **Operator** as =
 - c. Set **Value** as **68**
 - d. Add **Paren** after it
8. For **Notes**, specify which condition set is for DHCP traffic exception
9. Click **Save**
