

## FortiSIEM Firewall DHCPs Rule Exception Change Documentation

### Problem

With initial rule exception being too broad, granularity was needed to ensure denied DHCPs traffic will be excluded by reviewing Source IPs of known DHCP servers as well as the Source/Destination Ports

The current rule exception was based on Destination Ports 67/68. This was due to the necessary attributes not appearing under the “Attribute” dropdown during exception creation.

### Actions Needed

To have **Source IP** and **Source TCP/UDP Port** attributes appear under the Attribute dropdown:

1. Log in at [FQDNOfFortiSIEMServer] with a ‘Full Admin’ account
2. Go to **Resources > Rules**
3. Select rule ***Sudden Increase in Firewall Denied Outbound Traffic To A Specific TCP/UDP port***
4. Click **Edit** and select **Step 2: Define Condition**
5. Next to Subpattern **StatHighPort**, click **Edit** to open **Edit SubPattern** window

Adware process found - Edit Details

Step 1: General > Step 2: Define Condition > Step 3: Define Action

Condition: If this Pattern occurs within any 300 second time window

| Paren | Subpattern | Paren       | Next | Row |  |  |  |
|-------|------------|-------------|------|-----|--|--|--|
|       |            | AdwareFound |      |     |  |  |  |

Save Cancel

## FortiSIEM Firewall DHCP Rule Exception Change Documentation

**Edit SubPattern**

Name: DomainAcctLockout

| Filters: | Paren | Attribute  | Operator | Value                              | Paren | Next   | Row |
|----------|-------|------------|----------|------------------------------------|-------|--------|-----|
| +        |       | Event Type | IN       | EventTypes: Domain Account Lockout | -     | AND OR | +   |

| Aggregate: | Paren | Attribute             | Operator | Value | Paren | Next   | Row |
|------------|-------|-----------------------|----------|-------|-------|--------|-----|
| +          |       | COUNT(Matched Events) | >=       | 1     | -     | AND OR | +   |

Group By: Attribute

| Attribute        | Row | Move |
|------------------|-----|------|
| Reporting Device | ⊙   | ↑ ↓  |
| Reporting IP     | ⊙   | ↑ ↓  |
| User             | ⊙   | ↑ ↓  |

Run as Query Save as Report Save Cancel

6. Under **Group By**, add a new row at the bottom
7. Set new row **Attribute** as **Source IP** (This forces the rule to recognize the attribute and its value)
8. Repeat Steps 6-7, with **Attribute** as **Source TCP/UDP Port**
9. Click **Save**
10. Go to **Step 3: Define Action**
11. Next to **Action**, click **Edit**
12. Add a new **Incident Attribute** row at the bottom with the following:
  - a. Set **Event Attribute** as **Source IP**
  - b. Set **Subpattern** as **StatHighPort**
  - c. Set **Filter Attribute** as **Source IP**
13. Add a new **Incident Attribute** row at the bottom with the following:
  - a. Set **Event Attribute** as **Source TCP/UDP Port**
  - b. Set **Subpattern** as **StatHighPort**
  - c. Set **Filter Attribute** as **Source TCP/UDP Port**
14. Click **Save**

To add **Source IP** and **Source TCP/UDP Port** on previous existing rule exception:

1. Log in at [FQDNOFortiSIEMServer] with a 'Full Admin' account
2. Go to **Resources > Rules**
3. Select rule **Sudden Increase in Firewall Denied Outbound Traffic To A Specific TCP/UDP port**
4. Click **Edit** and select **Step 3: Define Action**
5. Next to **Exceptions**, click **Edit**

## FortiSIEM Firewall DHCP Rule Exception Change Documentation

The screenshot shows the 'Step 3: Define Action' configuration page. On the left, there are dropdown menus for 'Severity' (set to '10 - HIGH'), 'Category' (set to 'Security'), and 'Subcategory' (set to 'Execution'). Below these are 'Action' (set to 'Defined') and 'Exception' (set to 'Defined', which is underlined in red). On the right, there are settings for 'Dashboard' (unchecked), 'Notification' (set to '24 Hours'), 'Impacts' (set to 'Application'), 'Watch List' (set to 'Undefined'), and 'Clear' (set to 'Undefined'). At the bottom are 'Save' and 'Cancel' buttons.

6. With one pre-existing **Destination Port** condition:
  - a. Add **Paren** before it
  - b. Set **Operator** as =
  - c. Set **Value** as **68**
  - d. Set **Next** as **AND**

The 'Edit Rule Exception' dialog box shows a table of conditions. The first row has a red '+' icon in the 'Paren' column, 'Destination Host Name' in 'Attribute', 'IN' in 'Operator', and 'MalwareSites: DigiCert, Malw:' in 'Value'. The second row has a red '+' icon in the 'Paren' column, 'AND' in 'Next', and a red '-' icon in the 'Row' column. Below the table, there is a section for 'Notes' with three exclusion URLs: 'Exclusion: Mozilla Telemetry URL', 'Exclusion: Oracle Java Auto Updater URL', and 'Exclusion: DigiCert SSL certificate revoke verification URL'. At the bottom are 'Save' and 'Cancel' buttons.

| Paren | Attribute             | Operator | Value                         | Paren | Next | Row |
|-------|-----------------------|----------|-------------------------------|-------|------|-----|
| +     | Destination Host Name | IN       | MalwareSites: DigiCert, Malw: | +     | AND  | -   |
| AND   |                       |          |                               |       |      |     |

Notes:

- Exclusion: Mozilla Telemetry URL
- Exclusion: Oracle Java Auto Updater URL
- Exclusion: DigiCert SSL certificate revoke verification URL

7. For new condition directly below:
  - a. Set **Attribute** as **Source IP**
  - b. Set **Operator** as **IN**
  - c. Set **Value** as **X.X.X.X**
  - d. Set **Next** as **AND**
8. For new condition directly below:
  - a. Set **Attribute** as **Source TCP/UDP Port**

## FortiSIEM Firewall DHCPs Rule Exception Change Documentation

- b. Set **Operator** as =
  - c. Set **Value** as **67**
  - d. Add **Paren** after it
9. For **Notes**, specify which condition set is for DHCPs traffic exception
10. Click **Save**
